Simpang 347, Jalan Pasar Baru,
Gadong BE1318
Negara Brunei Darussalam

“

This course provides the foundations in Strategic Foresight to support policy making and strategic planning to create wiser futures.

Participants will achieve competency in foresight tools and scenario planning approaches such as emerging issues analysis, horizon scanning, futures wheel, Shell scenario building, Manoa method, causal layered analysis and more.

The course will have international recognition as it incorporates competency assessment evaluated by UNESCO Chair for Future Studies, and Sejahtera Centre for Sustainability and Humanity, International Islamic University Malaysia (IIUM).

”
